# IMPORTANT

Print these pages at 100% scale (instructions below)**.**

Print this page and measure one of these distances.

Metric: Measure between the two vertical lines and verify to the mm.

$\longleftarrow$ 140.0mm between lines $\longrightarrow$

US/Imperial: Measure between the two vertical lines and verify to a 1/16th of an inch.

$\longleftarrow$ 6.0" between lines $\longrightarrow$

If the measurements above are not correct, you may not have printed at 100% scale, and **your projects may not be the correct size**. To fix, check the print scale settings and re-print.

To print at 100% scale:

Microsoft Edge browser: When Printing, expand **More settings** and under **Scale** pick **Actual size**.

Chrome browser: When Printing, expand **More settings** and beside **Scale** pick **Custom** and then below ensure the number is **100**.

**Adobe Acrobat**: On Print dialog, in Page Sizing area, pick **Actual Size**.

Note, the distance between targets 1 and 5 centers on the A sheet should be 139.2mm or 5.48".
